PRODUCT CHECK MANAGER

This helpful tool forms part of our Quality Management module and allows you to complete checks on all products within your business as you go via your mobile device, from raw materials through to finished products. Report on issues, share with suppliers and receive corrective action responses.

FEATURES INCLUDE:

- Ability to create fully customised checks.
- Build response templates for the customer.
- Easy form builder process.
- Set-up customisable pre-set answers.
- Large range of answer templates, i.e: dropdown boxes, checkboxes, date picker etc.
- Ability to assign conditions means that if certain answers are given the tool will ask further questions.
- Ability to analyse checks.
- Assign owners of non-conformances & assign tasks.
- Generate automatic reminders for to-do tasks.
- Filtering available for all sections & activities.
- View checks at site or group level.

- Ability to export to PDF.
- Set approvers of checks.
- Report on checks through a widget.
- Generate comparison reports.
- Generate financial reports.
- View history of checks & activity.
- Checks can be downloaded to a mobile device, filled in and then uploaded to the Foods Connected platform where they can be easily accessed from your desktop.

Our Quality Management module with each of it's tools interconnects and integrates seamlessly with our Supply Chain Management and Trading and Planning modules and are available on the Foods Connected single pane of glass platform.
