

PURCHASING MANAGER

This helpful tool forms part of our Trading and Planning module and allows you to negotiate and agree the best trade deals with your customers and suppliers.

FEATURES INCLUDE:

- ✓ Build detailed purchasing templates designed to speed up the pricing process, with the ability to import product quantities, set delivery dates and add costing scenarios.
 - ✓ Use previously created templates to send regular purchasing requests faster to chosen suppliers without the hassle of emails and spreadsheets.
 - ✓ All purchasing enquiries sent on the system are held in one place with clear visibility over their highlighted statuses such as 'awaiting supplier response', 'require your action' or 'finalised'.
 - ✓ Quickly view suppliers responses and respond within the purchasing template making it simpler to track the negotiation history for both the customer and the supplier.
 - ✓ Create pricing grids which cross reference carcass weight and grade. These can be attached to purchasing contracts to determine the final price based on the quality of products provided.
 - ✓ Quickly generate reports to analyse the data received back from your purchasing enquiries enabling you to compare pricing across multiple suppliers and secure the best deals.
 - ✓ Display pricing reports in accessible charts and view directly from your custom dashboard maintaining clear visibility over who is best to purchase from.
- Our Trading and Planning module with each of its tools interconnects and integrates seamlessly with our Supply Management modules and Quality Management modules and are available on the Foods Connected single pane of glass platform.
