

SUPPLIER MANAGER

This helpful tool forms part of our Supply Chain Management module allowing you to manage your list of approved suppliers, gain access to approval documents and control and manage compliancy.

FEATURES INCLUDE:

- ✓ Easily search for your suppliers' using our 'Supplier List' where you can view all your suppliers' information in one customisable summarised table or through an individual detailed profile.
 - ✓ Select the status of your suppliers as action required, activity in progress, approved, requiring review, suspended and delisted to facilitate easy filtering.
 - ✓ Assign technical managers to suppliers individually or in a bulk update to assist in filtering for the suppliers that they are responsible for.
 - ✓ Create data forms to capture information tailored to your requirements, according to supplier type. This information can be incorporated into our map functionality for easy analysis.
 - ✓ Create customisable compliancy rules resulting in a clear, colour-coded summary of your supplier compliancy, with statuses of compliant, non-compliant and requires action.
 - ✓ Full transparency on requested new suppliers using our Supplier Approval Process. Through this process new suppliers won't become approved until they are fully compliant on the platform based on compliancy rules set by you.
 - ✓ Request new documents from your suppliers and view the colour-coded statuses of previously requested and uploaded documents. Our system automatically sends out regular reminders to suppliers when their documentation is about to expire or is already expired.
 - ✓ Create detailed maps of your selected suppliers' locations with the potential to add on exclusion zones. This enables you to quickly find out which suppliers fall within an exclusion zone and aids your contingency planning in identifying the extent of potential supply loss.
- Our Supply Chain Management module with each of its tools interconnects and integrates seamlessly with our Quality Management and Trading and Planning modules and are available on the Foods Connected single pane of glass platform.
