

TRACEABILITY MANAGER

This helpful tool forms part of our Supply Chain Management module allowing you to set up templates for easy tracing of specific product types, record traceability checks and report on results.

FEATURES INCLUDE:

- ✓ Create fully customisable traceability check templates with a diverse range of field types including image attachments for labels, within our easy-to-use form builder.
 - ✓ For quicker form building, set up customisable pre-set fields for consistently used options in your template.
 - ✓ Set up scoring criteria for automatic score generation and configure email triggers based on which options are selected within the check eliminating the need for extra tasks and saving time after the check has been completed.
 - ✓ Record new checks on the web or on our user friendly app, share them with suppliers and request more information on their response.
 - ✓ View traceability checks and export to PDF.
 - ✓ Full transparency and accountability of edits made to the traceability check.
 - ✓ Create analysis, comparison, score over time and snapshot reports on traceability checks to analyse supplier responses with charts and tables that can be exported to PDF or Excel.
 - ✓ Create financial reports for specific supplier's traceability checks that can be exported to Excel. Once a financial report template is created, new reports can be created quickly and easily using the same parameters but with updated dates.
 - ✓ Create widgets from the charts in your reports which can be integrated in our customisable dashboard and then shared with other company users.
- Our Supply Chain Management module with each of it's tools interconnects and integrates seamlessly with our Quality Management and Trading and Planning modules and are available on the Foods Connected single pane of glass platform.
